

2nd Nordic Conference on Research in Patient Safety and Quality in Healthcare

6-7 March, 2012

Copenhagen, Denmark

Overview

The overall theme of the conference is *Patient Safety and Quality in Healthcare*. The aim is to gather Nordic researchers working in the field of patient safety and quality improvement in order to share knowledge and ideas. Leading and internationally renowned researchers will be giving key-note presentations. Selected attendees will have the opportunity to present their research followed by discussion within the following themes:

- Research methods in patient safety and quality improvement
- Identification and mitigation of risks, hazards and quality deficits
- Translating evidence into practice
- Evaluation of safety and quality interventions
- Involvement of patients and relatives in patient safety and quality improvement
- Measuring and improving safety culture
- Regulating for patient safety and quality
- Organizational characteristics affecting safety and quality

Abstracts invited within conference themes

Who should attend?

Anyone who is involved or has an active interest in research into patient safety and quality of care may benefit from participation. The conference is multi-professional and researchers from disciplines such as medical science, humanities and social sciences as well as engineering are the target group. In addition, clinicians and anyone who wants to know how evidence is established or who would like to get an update on the status of research in safety and quality is welcome!
